# 01 COMPANY INTRODUCTION

Shanghai Luyao industry co.ltd, established in 2002, is a major manufacturer of high-quality PVC edge banding and pvc films, servicing over 100 countries including Canada, Australia, Russia, Spain, and the UAE. Our two modern manufacturing bases demonstrate our dedication to quality and innovation, allowing us to efficiently address the different demands of our customers.

We prioritize superior products and great customer service, building global win-win collaborations. As we continue to expand and innovate, our mission remains to be the preferred partner for dependable PVC solutions, therefore strengthening our reputation in the worldwide market.

# COMPANY HISTORY

**2002.1.8**

The Company Established

**2017.1.9**

Attending a Trade Fair

**2019.7.1**

We started from producing high quality PVC edge banding, adopted advanced technology and equipment from abroad and we have two production bases for PVC related products.

**2022.8.1**

Till now we've sold to more than 60 countries all over the world, such as Canada, Australia, Russia, Spain UAE etc and get very good market feedback!

**2024.9.1**

We always pursuit in the high quality products, best customer service and win-win cooperation with the customers's all over the world!

## COMPANY ENVIRONMENT

# 02 PVC EDGE BANDING

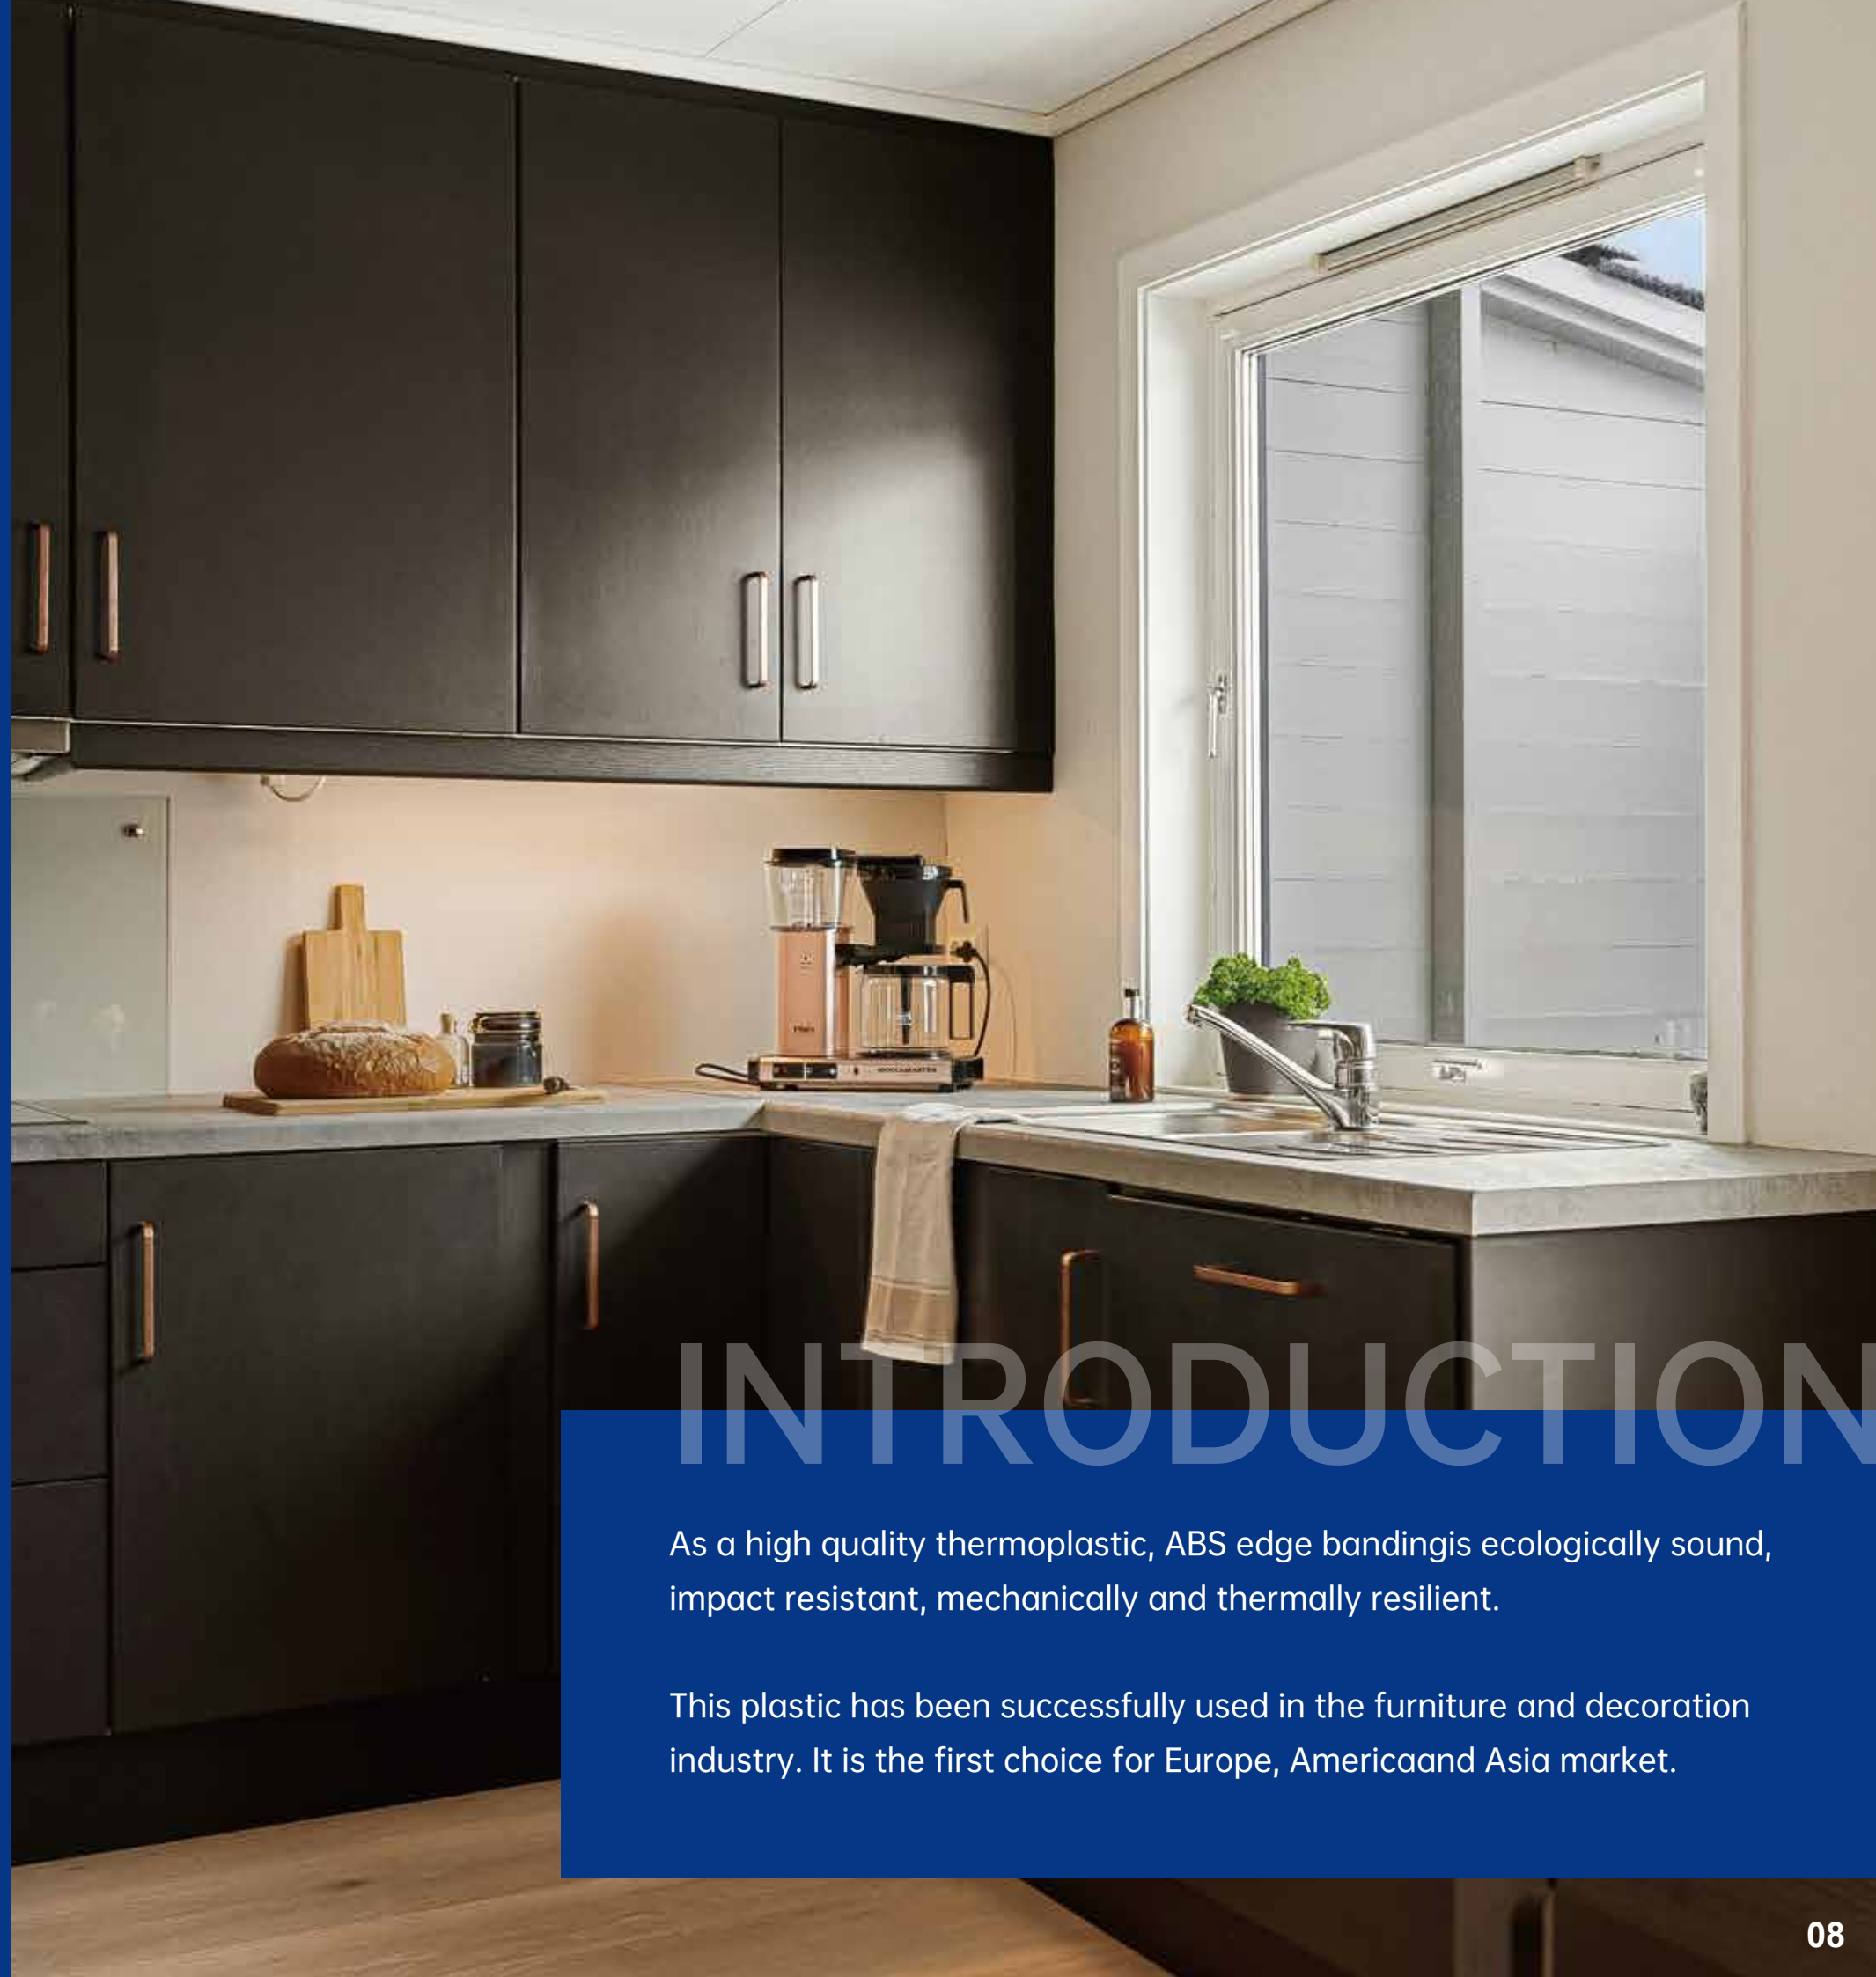

ecologically sound

impact resistant

mechanically

thermally resilient

## INTRODUCTION

As a high quality thermoplastic, ABS edge banding is ecologically sound, impact resistant, mechanically and thermally resilient.

This plastic has been successfully used in the furniture and decoration industry. It is the first choice for Europe, America and Asia market.

# WOOD GRAIN

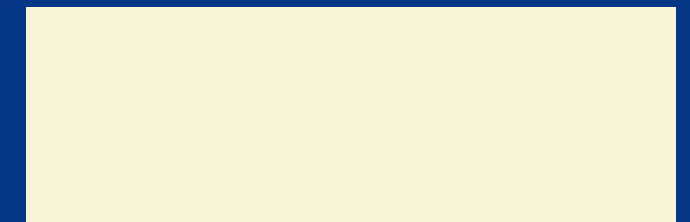

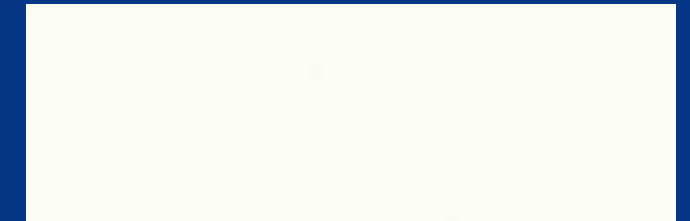

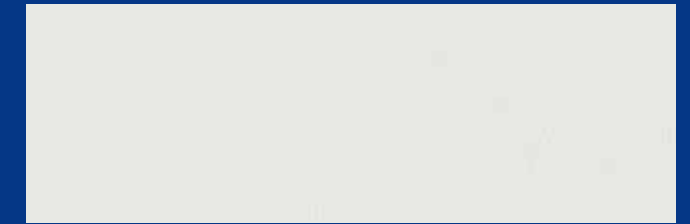

Anti-Scratch PVC edge banding is made of high quality materials and scientific formula. It is produced with state of the art machinery. The series consist of avant-garde and popular gains and embossings. It is characterized by rich and clear texture, vivid, wood, effect, high wear resistance and easiness to clean. It is coated with primer to ensure the perfect bonding between the edge banding and the board. The edge banding would not turn whitish or fracture after trimming.

# SOLID COLOR

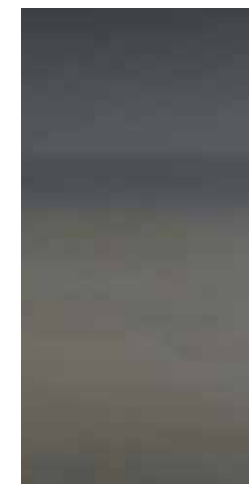

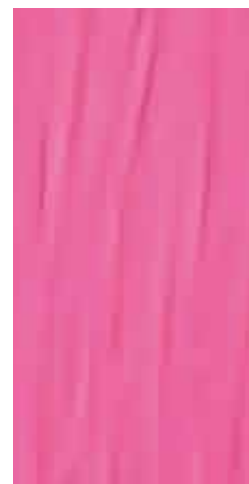

Solid Color PVC edge banding is made of high quality materials and scientific formula. It is produced with state of the art machinery. The series has a variety of colors and can be customized according to customer special request.

# HIGH GLOSSY

High glossy UV coated edge banding is made with best quality UV materials imported from Germany, achieving good finish smoothness, scratch resistance and appearance, which is up to the highest international standards with perfect cost efficiency.

# 03 ABS EDGE BANDING

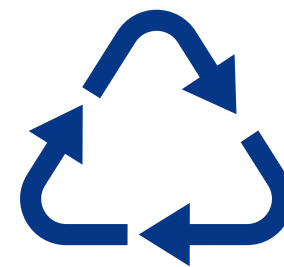

ABS edge banding, a high-quality thermoplastic, is renowned for its ecological sustainability, impact resistance, and mechanical and thermal resilience. This material has been successfully integrated into the furniture and decoration industries, becoming a preferred choice in markets across Europe, America, and Asia.

ABS edge banding is composed of a plastic alloy polymerized from acrylonitrile, butadiene, and styrene. It is environmentally friendly, solid, and boasts excellent resistance to both high and cryogenic temperatures. As such, it is poised to gradually replace traditional materials, emerging as the mainstream decorative material for mid- to high-end furniture.

## INTRODUCTION

ENVIRONMENTALLY FRIENDLY

CORROSION PREVENTIVE

HIGH TEMPERATURE RESISTANCE

WEAR RESISTANT

# WOOD GRAIN

We use advanced printing technology with clear texture and natural color, which can perfectly match the color and texture of various furniture boards. After trimming, the rounded corners are very smooth and shiny, with good glossiness, which not only enhances the overall beauty of the furniture, but also strengthens its durability.

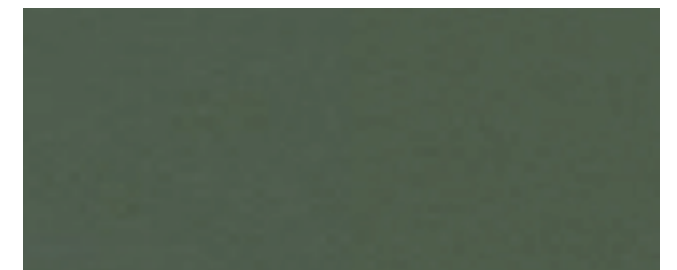

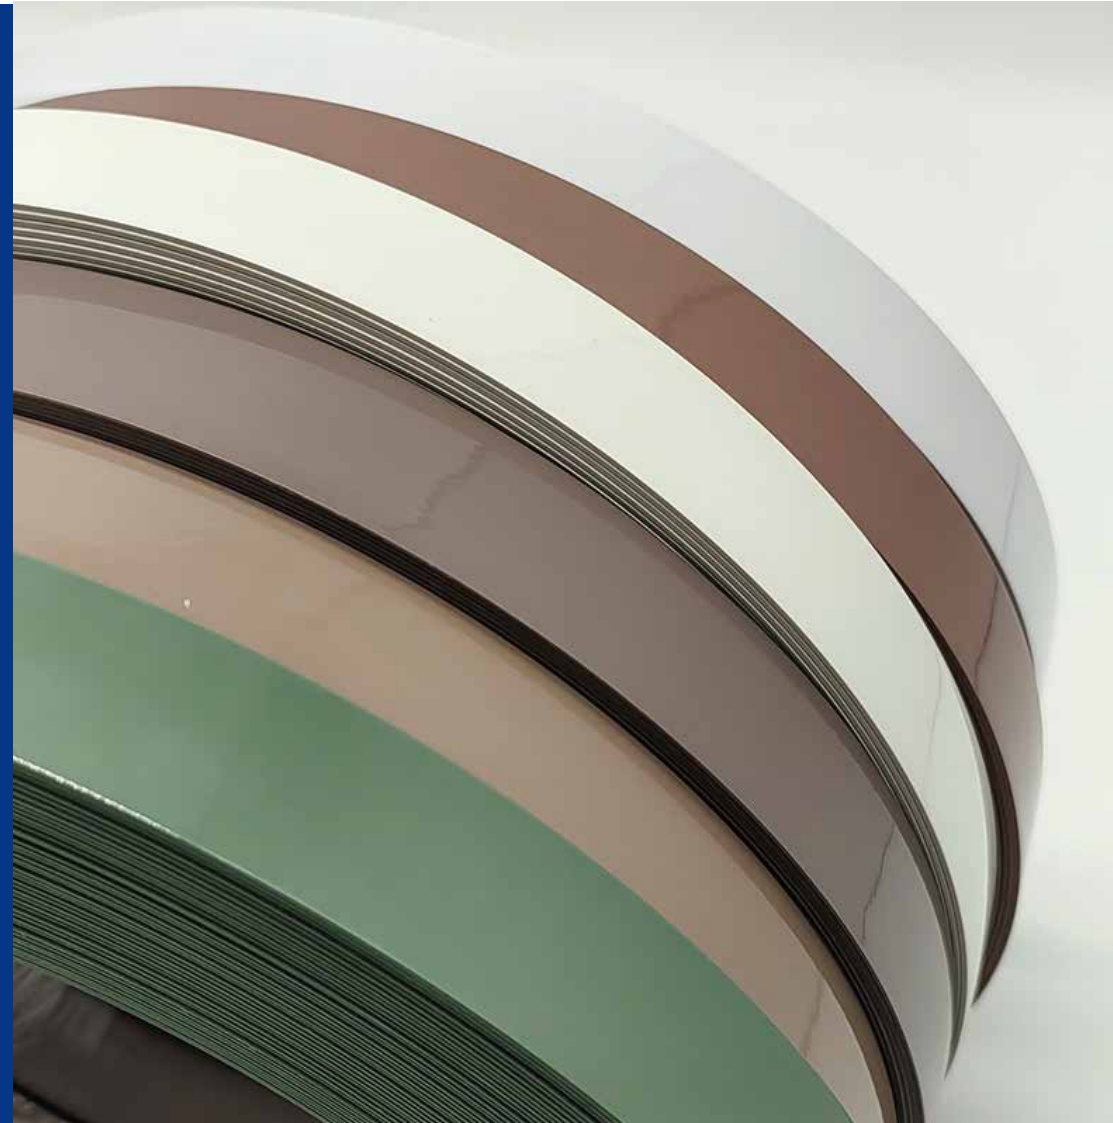

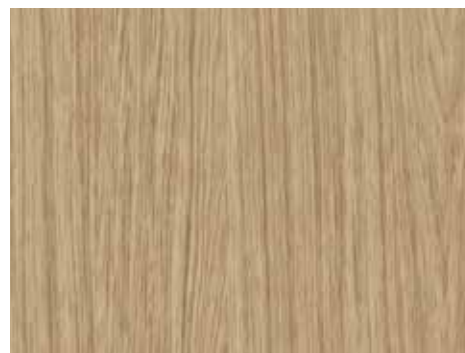

## SOLID COLOR

Using ABS resin or ABS/PVC mixed material, the surface can be coated with UV or treated with high gloss to enhance wear resistance and fade resistance.

Solid color design provides monochrome coverage without texture interference, suitable for minimalist style furniture

## HIGH GLOSSY

High glossy ABS edge banding is a high-quality edge banding material mainly made of ABS resin and processed by special technology, with high gloss, wear resistance, corrosion resistance, aging resistance and other characteristics.

---

**WORD OF MOUTH CHOICE**  
**BEST-SELLING WITHOUT HINDRANCE**

---

The choice of thousands of customers, the dual guarantee of quality and appearance

# 04 ACRYLIC EDGE BANDING

Acrylic is a high-quality material that can present the product's 3D transparent, smooth and flowing texture, and can be customized in any color, including double color.

## INTRODUCTION

### 3D TRANSPARENT

The visual effect is close to glass, and the colors are bright and long-lasting

### SMOOTH

The visual effect is close to glass, and the colors are bright and long-lasting

### DOUBLE COLOR

The visual effect is close to glass, and the colors are bright and long-lasting

Acrylic edge banding

Smooth surface, no blistering, no stretching, 3D gloss, widely used in high-end market

# 07 HOT MELT GLUE

## GLUE GRANULE

EVA HOT MELT GLUE FOR EDGE BANDING

Temperature: 150°-180°, 180°-210°

Color: white, beige, yellow transparent, white transparent, customizable

Properties: Good wetting properties, High initial viscosity, No stinging, Good thermal stability.

Application: to cover the exposed sides of materials such as fiberboard, particle board or MDF, plywood, core-board, and fireproofing board etc. Banding with different materials including PVC, ABS and acrylic etc.

# 08 PVC FILM

## GRAY-LAMINATED FILM

Size:

thickness: 0.12-0.35mm;

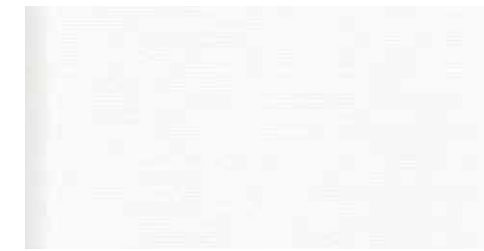

width: 1250mm, 1400mm, accept customization;

Properties: wear resistant, waterproof, fireproof, easy to clean;

APPLICATION: DOORS, CABINETS, PVC PANELS, PVC CEILINGS, PVC SHEETS
